

Neural Manipulation: Neuromeningeal Manipulation; An Osteopathic Approach to Trauma (NM1)

Dates: Nov. 5-7, 2010

Location: Albuquerque, NM

Instructors: A Member of the Jean-Pierre Barral International Teaching Team

Fees: \$795 - Early Reg Discounts Available

Registration: www.barralinstitute.com • 866-522-7725

Credits: This course is approved for 18 Category II IASI CE Credits

Course Description: This is a specialized course focusing on the impact of whiplash. Course Highlights: • Study the three primary areas of trauma as they relate to whiplash: physical laws, evaluation and treatment. • Learn the appropriate anatomy and physiology for treatment of whiplash and trauma conditions. • Learn to locate and release restrictions along the meningeal system. • Assess injuries to the soft tissues of the cervical region and learn treatment protocols for optimal release. • Learn tests to determine restriction patterns of the cervicobrachial region. • Understand how whiplash creates restriction patterns throughout the body. • Identify techniques that encompass the whole body, as the whole body receives collision forces in a whiplash injury, not just the cervical spine. • Learn to evaluate restrictions in the lumbosacral region. • Discover new applications of visceral manipulation principles and techniques as they can be utilized for patients presenting whiplash and other conditions involving trauma. • Compare treatment sequence and tests for whiplash and traumatic injuries.

Instructors Bios: All Teachers who are members of the Jean-Pierre Barral International Teaching Team are clinical practitioners first and teachers second. They have done extensive studies with Jean-Pierre Barral, the developer of Visceral Manipulation, and have successful clinical practices so when they teach, they teach from experience. They continue to meet annually with Barral for additional training and updates on the clinical work.
